‘Most women these days play many different roles in their lives and are incredibly busy. They need wardrobes that provide versatility, variety and value for money, says Martinsen, personal stylist and director of Simply Style Image Professionals Ltd. “Women want to look great without having to spend an hour every morning stressing about what to wear. They need a wardrobe they can rely on to offer them great choices they can throw together fast and be able to walk out the door knowing they look good.”

Ceeann is a qualified and experienced Image and Colour Consultant who specialises in helping women look and feel their best. Through Style and Colour Analysis, Makeup, Wardrobe Assessments and Personal Shopping, Ceeann provides the

tools to enable all women to achieve fashion confidence and increase their self esteem

“Most women shop randomly, rather than to a plan, and end up with a wardrobe full of clothes and nothing to wear and often end up feeling indifferent to the clothes in their wardrobe” she says, ‘this only leads to frustration and time wasting in the mornings and worse still, walking out the door not feeling your best”.

Ceeann’s focus is on teaching women how to create a wardrobe that not only flatters their body shape and complements their colouring, but one that also meets their personality and lifestyle needs. Helping her clients get the most out of the clothes they already have, teaching them how to co-ordinate outfits and how to shop smarter and create a successful wardrobe are all part of the services provided by Simply Style Image Professionals Ltd.
